

It should not be up to the NAB to dictate what an American Citizen is permitted to hear on satellite radio. I respectfully urge the FCC to reject the NAB's petition 04-160, and to support XM's ability to provide the kind of programming that I deserve and demand. I pay for XM radio. It is my choice and my right to hear traffic and weather reports. If the NAB doesn't like it, maybe they should improve the horrible service they shove down the throats of America. I don't believe that the FCC should allow the NAB to have some kind of special protection for their mediocre product. This is America, and Satellite Radio should be free to create a better product. I am totally against this move by the NAB!!

Sincerely,

Greg Schumacher
